Biographical / Historical

Comics became a popular medium for illustrated art in the early twentieth century, starting with newspaper comic strips in the 1920s and comic books in the 1930s. Comic book publishing history is generally broken up into four periods. The Golden Age (1938-1956), during which many popular superhero characters were born, eventually saw comic book popularity fall after WWII. The Silver Age (1956-1970) represented a revival in interest in comics and coincided with the introduction of the Comics Code Authority (CCA), a regulatory group which sought to rid comics of salacious content, especially related to sex, drugs/alcohol, and positive portrayals of criminality. During the Bronze Age (1970-1986), some publishers began to ignore the standards of the CCA in order to address social concerns of the day. This move toward realism continued in the Modern Age (1986 to present), which saw many comics focus on darker or more mature stories.

Almost two thirds of the 1500 titles in this collection are of the Modern Age, and most of the rest are split evenly between the preceding Silver and Bronze Ages. Only a few are from the earlier Golden Age.
Scope and Contents

This collection consists of comic books and other graphic formats from the 1940s to the present day. It includes literary adaptations, movie adaptations, and original stories, largely in the genres of science fiction, fantasy, adventure, and horror.

The collection is divided into four categories.

Comics Based on Books contains items adapted from or inspired by specific literary sources. Many of these are from the Classics Illustrated series (1940s-1960s).

Comics by Subject contains items grouped by theme or with a popular central character.

Comics by Genre contains items grouped by fiction genre, most of which are some type of speculative fiction (science fiction, fantasy, alternate history, etc.) or horror (including "weird" fiction). Other genres include detective, spy, western, and adventure, as well as nonfiction.

Comics and graphic novels by format contains irregularly sized comics and graphic novels; some are trade paperbacks, while others have magazine binding.
